Details
The Browning Automatic Rifle (BAR) model 1918 was developed by John M. Browning in 1917. Marlin-Rockwell Corporation, Colt, and Winchester made 85,000 rifles during WWI to meet the US military requirement.

Ohio Ordnance Works, Inc. manufactures a semi-automatic version of this rifle, 1918A3 (WWII version). The only one of its kind in production anywhere in the world, it is manufactured with some of the original USGI WWI and WWII parts.

For the last 18 years, we have taken great care in building of each rifle.

Only the highest quality Ohio Ordnance original and USGI standard parts are used in its production.

The heart of the 1918A3 is the receiver made from 8620 steel casting that has been carburized and induction heat treated. The castings are machined on state-of-the-art, CNC machining centers. Every rifle is fully assembled, inspected, test-fired and re-inspected under the direct supervision of our master armorer.

The entire manufacturing process is accomplished at our facility in Chardon, Ohio. Our team is made up of experts in the military ordnance field, some with over 40 years' experience in the trade.

Specifications
Caliber .................. 30-06
Finish .................. Phosphate
Operation ................ Locked breech, gas operated with three position regulator. Semi-automatic, closed bolt, hammer fired. Two position selector lever
Feed Mechanism ........... 20rd., staggered column, detachable box type magazine

Details
Ohio Ordnance Works, Inc. (OOW) is pleased to offer our unique, re-engineered, belt-fed, semi-automatic version of the M240 machine gun. Delivering up to minute-of-angle (MOA) accuracy, high capacity, and proven durability, this weapon is ideal for situations which require highly accurate, sustained, controlled fire.

The M240-SLR is dimensionally identical to the M240, and is able to integrate into any M240 mounting system. The most noticeable difference between the M240-SLR and the M240 machine gun is that the SLR fires from a closed bolt. Many of the internal parts of the firearm have been redesigned, introducing an entirely new breed of M240.

The bolt and trigger groups are new and not interchangeable with the original M240. These new internal parts are all manufactured by OOW at our ISO certified facility where we are able to ensure that quality meets our stringent standards.

While the internal mechanism of the firearm has been redesigned, we've kept it simple. The M240-SLR requires only two tools to break it down. All other actions such as barrel changing, loading, feed cover functions, etc. remain the same as the original M240.

In field tests, using match ammunition, a randomly chosen weapon easily produced minute-of-angle (1”) groups at 100 yards! In both single and rapid fire (400 rpm) tests, absolutely no malfunctions were experienced with the gun...a true testament to its superb engineering.

Specifications
Caliber .................. 7.62 x 51mm
Finish .................. Phosphate
Operation .......... Closed Bolt, Semi-Automatic
Feed Mechanism .. M-13 Link
Weight Empty ........ 24.2 pounds
Length Overall ...... 47.5 inches with flash hider

New Manufacture
M2.50 HB FLEX MG & 12.7 M2.50 HB QCB

The M2HB .50 Caliber is one of the specialties of Ohio Ordnance Works, Inc. (OOW). Constructed to exceed military expectations and quality standards, each weapon is built with individualized attention to detail and multi-level inspection of quality.

From magnetized crack and weld inspection, to final function and finish, OOW guarantees that both their M2HB and the M2 QCB (Quick Change Barrel) will out perform all your current heavy weight machine gun, anti-vehicle, and force-protection needs.

While the M2 QCB offers the same protection and capabilities that the classic M2 Heavy Barrel offers with cyclic rate (450-550 rpm), effective range (7,400 yards), and ease of maintenance, it also offers the users reduced barrel change time.

The system's preset head space settings can mean precious rapid response time under fire, once the barrel reaches "hot-gun" status.

Specifications

- Weight of Gun (approx.) ............... 84 lb (38.10kg)
- Weight of Barrel ....................... 26 lb (11.79 kg)
- Length of Gun ......................... 65.13 inches (165.43 cm)
- Length of Barrel ...................... 45 inches (114.30 cm)
- Length of Rifling (approx.) .......... 41.88 inches (106.38 cm)
- Number of Lands & Grooves .......... Eight
- Twist, Right-Hand ...................... One turn in 15 inches (38.10 cm)
- Feed .................................. Link-belt
- Operation ............................... Short recoil
- Cooling ................................ Air
- Muzzle Velocity (approx.) ............ 3,050 fps (929.67 mps)
- Max Range (approx.) ................. 7,400 yards (6,767 m)
- Max Effective Range (approx.) ...... 2,000 yards (1,829 m)
- Cyclic Rate ............................. 450-550 rpm

Capable of Right Hand or Left Hand Feed (upon part change out)

REQUIRES SHIPMENT TO FFL

Providing a competitive and superior quality alternative, Ohio Ordnance Works, Inc. (OOW), offers a complete OOW240 general purpose machine gun package. Operator and Armorer training as well as all special tools, barrels, parts, accessories, depot level repairs and rebuilds are available with the OOW240 Gun Systems.

OOW is a type 10 NFA Firearms Manufacturer and Type 11 FFL Importer. We specialize in arsenal level manufacturing, repairing, rebuilding and servicing of small arms and crew served weapon systems. With a depth of experience, a comprehensive parts inventory and the tooling, gauges, and fixtures to execute complex job requirements, OOW is an obvious choice for your manufacturing requirements.

OOW is ready to fill any and all of your small arms and crew served weapons needs. We have proven time and time again to all the branches of the US Military Services and many NATO allied countries that our products are among the best offered by any firearms manufacturing company. We are equipped to meet all aspects of manufacturing, sales, repair, training, and distribution - both domestic and international - and stand willing to serve and able to deliver.

**Specifications**

**Weight:**
- 22.8 lbs (OOW/OOW240C)
- 27.1 lbs (OOW240B)
- 22.9 lbs (OOW240D)
- 25.7 lbs (OOW240E1)
- 25.8 lbs (OOW240G)
- 25.8 lbs (OOW240H)
- 24.1 lbs (OOW240N)

**Rapid:**
- 700 RDS/M (2-3 sec between bursts) - Change barrel every 2 minutes.

**Cyclic:**
- 650 to 950 RDS/M - Not intended to fire at 950 RDS/M. This will cause accelerated wear/damage to the barrel and rest of weapon.
- 550-650 RDS/M - OOW240B/OOW240N with Hydraulic Buffer.

**Sustained:**
- 100 RDS/M (4-5 sec between bursts) - Change barrel every 10 minutes.

**Range:**
- Maximum range: 3,725 meters
- Maximum effective (point): 800 meters

**Tracer Burnout:**
- Approximately 900 meters

The OOW 249 is the belt-fed, air-cooled, fully automatic light machine gun currently deployed by US and international forces. Since the invasion of Panama in 1989, it has proven itself in every major conflict. For over 20 years, the OOW 249 has seen every possible condition and environment and continues to come out on top.

- Consistent, reliable, on-time delivery achieved with ISO certified, multi-tier inspections  
- Ready for battle right out of the box – Tested for functionality and accuracy at the factory  
- Risk Free Purchasing with our "no nonsense" parts and workmanship warranty  
- Be prepared for any environment or scenario – Multiple Configuration options allow you to customize to a unit’s specific needs

Ohio Ordnance Works, Inc. has been designing, machining, and assembling high quality machine guns for over 30 years. With the addition of the OOW 249 to our production line, OOW has evolved to provide customers with a single source for their Crew Served Weapons needs.

M240 SELECT FIRE™ TRIGGER GROUP

M240 Select Fire™
SKU: 11301079
Call For Quote
New Manufacture; For use in a Full-Auto only

Introducing ... M240 SELECT FIRE™
Finally...A PRACTICAL improvement for the M240 Weapon System!
Instant select fire capability with no hassle. Simply remove the original trigger group, and install the new Select Fire Trigger Pack into your M240 weapon system.

OOW Select Fire Trigger Pack supports all MAG and M240 Variants Including the following:
- C6 GPMG - Canada
- L7A1 / L7A2 - Great Britain
- M971 - Brazil
- KSP 58B - Sweden/Latvia
- Type 74 - Taiwan

DESIGNED FOR EASE OF USE
The patent pending trigger pack design features a selector to rapidly switch from semi-automatic to full-automatic firing. Designed with G.I. JOE in mind, following the K.I.S.S. requirement, it universally fits all MAG and M240 variants, is interchangeable with the push of one pin and requires no significant additional training.

THOROUGHLY TESTED
To ensure combat reliability, we gave the trigger pack a brutal beating in the factory...tested it, dropped it and shot it until our fingers bled!
- Endurance tested with ten thousand rounds fired in full and semi-automatic modes without failure.
- Drop tested at all angles from 2 meters. Sear stayed engaged regardless of shock to the system!
- Selector resistance remains constant after endurance testing of 10k rounds.
- Trigger pull remains positive to mil-spec after 10,000 rounds fired.

BATTLEFIELD ADVANTAGE
With the availability to switch from semi to full-automatic, the war fighter can now engage single targets or recon by fire without revealing the machine gunner’s position. The versatility of the trigger pack and improved accuracy of the semi-automatic mode provides the gunner with the option of switching between the role of machine gunner and rifleman. These options alone will broaden the strategic and tactical options and provide distinct battlefield advantages.
RECEIVER KITS

NON-GUNS FOR THE DISPLAY, SIMULATION & TRAINING COMMUNITY

CALL FOR QUOTE

NO BATFE transfer paperwork required
Dramatically cut customer lead times
Spare systems can be inventoried reducing service turnaround time
Custom configurations will flawlessly integrate with your system’s design and function
Non-Gun weights are equivalent to live weapon systems, which prevents fall off during simulation training
External dimensions are identical to live weapon specs for seamless mounting in current issue mounts and turrets

Modern Gun/Parts Condition Standards

New: Not previously sold at retail, in same condition as current factory production.

Like New: In New condition in every respect.

Excellent: New condition, used but little, no noticeable marring of wood or metal, bluing perfect, (except at muzzle or sharp edges).

Very Good: In perfect working condition, no appreciable wear on working surfaces, no corrosion or pitting, only minor surface dents or scratches.

Good: In safe working condition, minor wear on working surfaces, no broken parts, no corrosion or pitting that will interfere with proper functioning.

Fair: In safe working condition but well worn, perhaps replacement of minor parts or adjustments which would be indicated in advertisement, no rust, but may have corrosion pits which do not render article unsafe or inoperable.

Product History
Over the past 20 years, OOW developed and patented its own line of semi-automatic firearms and related accessories. These firearms include the 1918A3-SLR, M240-SLR, and the VZ 2000. This process led to the formation of our own Engineering and Quality Assurance Inspection departments.

OOW Today
An ISO9001:2015 certified company, OOW has a work force of 55+ employees who work within the company’s extensive manufacturing, assembly and engineering 30,000 square foot facility located on 5+ acres in Chardon, Ohio. Our knowledgeable staff offers a combined 100 plus years experience.

Ohio Ordnance Works, Inc. is your full service resource for all facets of the firearms industry. Our company is fully licensed to accommodate all aspects of firearms manufacturing, sales, and distribution of any ordnance commodity both domestic and overseas.

Product History
Over the past 20 years, OOW developed and patented its own line of semi-automatic firearms and related accessories. These firearms include the 1918A3-SLR, M240-SLR, and the VZ 2000. This process led to the formation of our own Engineering and Quality Assurance Inspection departments.

OOW Today
An ISO9001:2015 certified company, OOW has a work force of 55+ employees who work within the company’s extensive manufacturing, assembly and engineering 30,000 square foot facility located on 5+ acres in Chardon, Ohio. Our knowledgeable staff offers a combined 100 plus years experience.

Ohio Ordnance Works, Inc. is your full service resource for all facets of the firearms industry. Our company is fully licensed to accommodate all aspects of firearms manufacturing, sales, and distribution of any ordnance commodity both domestic and overseas.

About Us

Company History
Robert I. Landies, the owner and founder of Ohio Ordnance Works, Inc. (OOW), has been involved with ordnance for over 45 years. Beginning in 1964, Mr. Landies started his career working at TRW in the jet engine division and eventually moving to the Navy torpedo division. Continuing as a collector and gun-smith of military firearms, he gained extensive knowledge in a myriad of different weapon systems and designs during his seven years of military service with the U.S. Army in both active and reserve duty as an armor officer. Beginning in 1981, this knowledge was brought to bear through a full time business with the establishment of what is today known as Ohio Ordnance Works, Inc.

During the years 1981 - 1990, OOW engaged primarily in buying and selling military firearms, parts and accessories in the commercial market. Qualified employees and manufacturing machinery were added which facilitated the development of a repair department and the ability to build small orders of firearms from scratch for the commercial market.

Beginning in 1990, OOW began manufacturing firearms and ordnance for supply to different foreign and domestic government agencies. This capacity has expanded steadily over the years due to a wide base of weapon system knowledge, qualified personnel, state of the art machinery, new technology, and a commitment to excellence in both products and service.
